

PMC Panel Mount Power Supply

5 V 35 W 1 Phase / PMC-05V035W1A□

PMC

Highlights & Features

- Universal AC input voltage range
- Power will not de-rate for the entire input voltage range
- Full corrosion resistant aluminium casing
- Conforms to harmonic current IEC/EN 61000-3-2, Class A
- High MTBF > 700,000 hrs per Telcordia SR-332
- Safety approval according to IEC/UL 60950-1, IEC/EN/UL 62368-1 and EMI to EN 55032, Class B

Safety Standards

CB Certified for worldwide use

Model Number: PMC-05V035W1A□
Unit Weight: 0.18 kg (0.40 lb)
Dimensions (L x W x H): 98 x 97 x 38 mm
 (3.86 x 3.82 x 1.50 inch)

General Description

Delta's PMC series of panel mount power supply offers a nominal output voltage of 5 V, a wide temperature range from -10°C to +70°C and a highly dependable minimum hold-up time. The state-of-the-art design is made to withstand harsh industrial environments. What makes the product stands out from the crowd is its lightweight full aluminum body design, which can withstand shock and vibration according to IEC 60068-2. The PMC series also offers overvoltage and overload protection. Using a wide input voltage range design, it is compatible worldwide. The input also includes DC operating voltage from 125-375 Vdc. Best of all, this excellent design and quality does not come with a big price tag.

Model Information

PMC Panel Mount Power Supply

Model Number	Input Voltage Range	Rated Output Voltage	Rated Output Current
PMC-05V035W1A□	85-264 Vac (125-375 Vdc)	5 Vdc	7.0 A

Model Numbering

Panel Mount	Product Type C – Enclosed	Output Voltage	Output Power	Single Phase	No PFC	Connector Type A – Terminal Block J – IP20 Connector*

*Options

PMC Panel Mount Power Supply

5 V 35 W 1 Phase / PMC-05V035W1A□

Specifications

Input Ratings / Characteristics

Nominal Input Voltage	100-240 Vac
Input Voltage Range	85-264 Vac
Nominal Input Frequency	50-60 Hz
Input Frequency Range	47-63 Hz
Nominal DC Input Voltage	125-250 Vdc
DC Input Voltage Range*	125-375 Vdc
Input Current	< 0.9 A @ 115 Vac, < 0.8 A @ 230 Vac
Efficiency at 100% Load	> 78% @ 115 Vac, > 79% @ 230 Vac
Max Power Dissipation	0% load < 0.3 W @ 115 Vac, < 0.7 W @ 230 Vac
	100% load < 9.9 W @ 115 Vac, < 9.3 W @ 230 Vac
Max Inrush Current	< 30 A @ 115 Vac, < 60 A @ 230 Vac
Leakage Current	< 1 mA @ 240 Vac

*Safety approval according to IEC/EN/UL 60950-1 and IEC/EN/UL 62368-1.

Output Ratings / Characteristics**

Nominal Output Voltage	5 Vdc
Factory Set Point Tolerance	5 Vdc $\pm$ 2%
Output Voltage Adjustment Range	4.75-5.5 Vdc
Output Current	7.0 A (35 W max.)
Output Power	35 W
Line Regulation	< 0.5% (@ 85-264 Vac input, 100% load)
Load Regulation	< 1.0% (@ 85-264 Vac input, 0-100% load)
PARD*** (20 MHz)	< 70 mVpp
Rise Time	< 30 ms @ nominal input (100% load)
Start-up Time	< 2500 ms @ nominal input (100% load)
Hold-up Time	> 15 ms @ 115 Vac, > 80 ms @ 230 Vac (100% load)
Dynamic Response (Overshoot & Undershoot O/P Voltage)	$\pm$ 5% @ 85-264 Vac input, 0-100% load (Slew Rate: 0.1 A/ μ s, 50% duty cycle @ 5 Hz to 1 KHz)
Start-up with Capacitive Loads	6,600 μ F Max

**For power de-rating from 50°C to 70°C, see power de-rating on page 3.

***PARD is measured with an AC coupling mode, 5 cm wires, and in parallel with 0.1 μ F ceramic capacitor & 47 μ F electrolytic capacitor.

PMC Panel Mount Power Supply

5 V 35 W 1 Phase / PMC-05V035W1A□

Mechanical

Case Chassis / Cover	Aluminium
Dimensions (L x W x H)	98 x 97 x 38 mm (3.86 x 3.82 x 1.50 inch)
Unit Weight	0.18 kg (0.40 lb)
Indicator	Green LED
Cooling System	Convection
Terminal	PMC-05V035W1A□
	PMC-05V035W1A□
Wire	PMC-05V035W1A□
	PMC-05V035W1A□
Noise (1 Meter from power supply)	Sound Pressure Level (SPL) <40 dBA

Environment

Surrounding Air Temperature	Operating	-10°C to +70°C
	Storage	-25°C to +85°C
Power De-rating		> 50°C de-rate power by 2.5% / °C
Operating Humidity		5 to 95% RH (Non-Condensing)
Operating Altitude		0 to 3,000 Meters (9,840 ft)
Shock Test	Non-Operating	IEC 60068-2-27, 30G (300 m/S ²) for a duration of 18ms, 1 times per direction, 6 times in total
Vibration	Non-Operating	IEC 60068-2-6, 10 Hz to 150 Hz @ 50 m/S ² (5G peak); 20 min per axis for all X, Y, Z direction
Over Voltage Category		II
Pollution Degree		2

Protections

Overvoltage	< 6.5 V ±10%, SELV output, Hiccup Mode, Non-Latching (Auto-Recovery)
Overload / Overcurrent	> 120% of rated load current, Hiccup Mode, Non-Latching (Auto-Recovery)
Over Temperature	< 75°C Surrounding Air Temperature @ 100% load, Non-Latching (Auto-Recovery)
Short Circuit	Hiccup Mode, Non-Latching (Auto-Recovery when the fault is removed)
Internal Fuse at L pin	T3.15 AH
Degree of Protection	IP 20 (PMC-05V035W1A□)
Protection Against Shock	Class I with PE* connection

*PE: Primary Earth

Reliability Data

MTBF	> 700,000 hrs. as per Telcordia SR-332 I/P: 115 Vac & 230 Vac, O/P: 100% load, Ta: 25°C
Expected Cap Life Time	10 years (115 Vac & 230 Vac, 50% load @ 40°C)

Engineering Data

Output Load De-rating VS Surrounding Air Temperature

Fig. 1 De-rating for Vertical and Horizontal Mounting Orientation
> 50°C de-rate power by 2.5% / °C

Note

1. Power supply components may degrade, or be damaged, when the power supply is continuously used outside the shaded region, refer to the graph shown in Fig. 1.
2. If the output capacity is not reduced when the surrounding air temperature exceeds its specification as defined on Page 3 under "Environment", the device may run into Over Temperature Protection. When activated, the output voltage will go into bouncing mode and will recover when the surrounding air temperature is lowered or the load is reduced as far as necessary to keep the device in working condition.
3. In order for the device to function in the manner intended, it is also necessary to keep a safety distance as recommended in the safety instructions while the device is in operation.
4. Depending on the surrounding air temperature and output load delivered by the power supply, the device housing can be very hot!
5. If the device has to be mounted in any other orientation, please contact info@deltapsu.com for more details.

Output Load De-rating VS Input Voltage

- No output power de-rating across the entire input voltage range

PMC Panel Mount Power Supply

5 V 35 W 1 Phase / PMC-05V035W1A□

Assembly & Installation

- Ⓐ Mounting holes for power supply assembly onto the mounting surface. Power supply shall be mounted on minimum 2 mounting holes using M3 screw minimum 5 mm (0.20 inch) length.
- Ⓑ This surface belongs to customer's end system or panel where the power supply is mounted.
- Ⓒ Connector

Installation of Mounting Accessories

- Only use M3 screw ≤ 6 mm (0.24 inch) through the base mounting holes. This is to keep a safe distance between the screw and internal components.
- Recommended mounting tightening torque 4~8 Kgf.cm (3.47~6.94 lbf.in)

Safety Instructions

- To ensure sufficient convection cooling, always maintain a safety distance of ≥ 20 mm from all ventilated surfaces while the device is in operation.
- The device is not recommended to be placed on low thermal conductive surface, for example, plastics.
- Note that the enclosure of the device can become very hot depending on the ambient temperature and load of the power supply. Do not touch the device while it is in operation or immediately after power is turned OFF. Risk of burning!
- Do not touch the terminals while power is being supplied. Risk of electric shock.
- Prevent any foreign metal, particles or conductors to enter the device through the openings during installation. It can cause: Electric shock; Safety Hazard; Fire; Product failure
- Warning: When connecting the device, secure Earth connection before connecting L and N. When disconnecting the device, remove L and N connections before removing the Earth connection.

PMC Panel Mount Power Supply

5 V 35 W 1 Phase / PMC-05V035W1A□

Functions

- Graph illustrating the Start-up Time, Rise Time, and Hold-up Time

Start-up Time

The time required for the output voltage to reach 90% of its final steady state set value, after the input voltage is applied.

Rise Time

The time required for the output voltage to change from 10% to 90% of its final steady state set value.

Hold-up Time

Time between the collapse of the AC input voltage, and the output falling to 95% of its steady state set value.

Inrush Current

Inrush current is the peak, instantaneous, input current measured and, occurs when the input voltage is first applied. For AC input voltages, the maximum peak value of inrush current will occur during the first half cycle of the applied AC voltage. This peak value decreases exponentially during subsequent cycles of AC voltage.

Dynamic Response

The power supply output voltage will remain within $\pm 5\%$ of its steady state value, when subjected to a dynamic load from 0% to 100% of its rated current.

- 50% duty cycle / 5Hz to 1KHz

PMC Panel Mount Power Supply

5 V 35 W 1 Phase / PMC-05V035W1A□

Overload & Overcurrent Protections (Auto-Recovery)

The power supply's Overload (OLP) and Over current (OCP) Protections will be activated when output current (I_o) exceeds its specification as defined on Page 3 under "Protections". In such occurrence, the output voltage (V_o) will start to droop and once the power supply has reached its maximum power limit, the protection is activated and the power supply will go into "Hiccup mode" (Auto-Recovery). The power supply will recover once the fault condition of the OLP and OCP is removed and I_o is back within the specifications.

It is not recommended to prolong the duration of I_o when it is less than OLP/OCP point, but greater than 100%, since it may cause damage to the PSU.

Short Circuit Protection (Auto-Recovery)

The power supply's output OLP/OCP function also provides protection against short circuits. When a short circuit is applied, the output current will operate in "Hiccup mode", as shown in the illustration in the OLP/OCP section on this page. The power supply will return to normal operation after the short circuit is removed.

Overvoltage Protection (Auto-Recovery)

The power supply's overvoltage circuit will be activated when its internal feedback circuit fails. The output voltage shall not exceed its specifications defined on Page 3 under "Protections".

Over Temperature Protection (Auto-Recovery)

As described in load de-rating section, the power supply also has Over Temperature Protection (OTP). In the event of a higher operating temperature at 100% load, the power supply will run into OTP when the operating temperature is beyond what is recommended in the de-rating graph. When activated, the output voltage will go into bouncing mode until the temperature drops to its normal operating temperature as recommended in the de-rating graph.
